

Experience

HackerOne | Remote

Security Researcher & Bug Bounty Hunter | May 2026 – Present

Active vulnerability research on digital assets for global companies, participating in Vulnerability Disclosure Programs (VDP) and Bug Bounty programs to identify critical security flaws.

- **Vulnerability Detection:** Identification and reporting of security flaws (OWASP Top 10) such as XSS, IDOR, and injections in web applications and APIs.
- **Technical Analysis:** Preparation of detailed reports with Proof of Concepts (PoC) and mitigation recommendations for engineering teams.

Tiznagog Studios | Remote

Fullstack Developer Consultant & SEO Specialist | Freelance | October 2024 – Present

Personal tech consulting firm focused on high-performance web application development (Full Stack Development) and organic growth (SEO) through data engineering. Led the complete project lifecycle for clients and companies in Chile and Spain, integrating security and scalability into the architecture. Delivered over 18 projects with 100% client satisfaction.

- **SEO Engineering & Growth:** Ongoing collaboration with Grant Solutions (Spain) since 2025, leading technical strategies that doubled organic traffic (100% growth) in less than 6 months through infrastructure audits, as well as on-page and off-page optimization.
- **Full Stack Development & Architecture:** Strategic collaboration with Dyatec (Chile) since 2024, developing custom applications with scalable architectures and reusable components that reduced development time by 25%.
- **Security & Scalability:** Implementation of solutions based on the MERN stack and TypeScript, ensuring data integrity and server optimization to support high traffic volumes.
- **International Client Management:** Technical and strategic execution for various digital assets, guaranteeing quality and security standards across all deliverables.

Projects

OWASP Top 10 Vulnerability Scanner

Developed an automated vulnerability management tool using Go, focused on early risk detection within the secure software development lifecycle (SSDLC). The engine performs dynamic asset analysis to identify critical weaknesses, enabling prioritized remediation and ensuring cybersecurity compliance standards.

Education

B.S. in Computer Science & Software Engineering (Ingeniería Civil Informática)

Universidad Católica de la Santísima Concepción (UCSC) | 2022 – 2026

- **Relevant Achievements:**
 - 4th place in the UCSC Innovation Hackathon | October 2024
 - UCSC Innovation Incubator (Semillero de Innovación) | November 2024 – January 2025

- AWS Certified Cloud Practitioner | September 2026
- CompTIA Security+ Certification | August 2026
- Google Cybersecurity Certificate | July 2026
- Introduction to Data Science Certification | August 2025
- SEO and Content Marketing Certification | July 2025
- Project Management & Agile Fundamentals Certification | July 2025
- Power BI Certificate | June 2025
- Excel Certificate | June 2025
- Python Certification | August 2024
- JavaScript Certification | August 2024
- CSS Certification | May 2024
- HTML Certification | April 2024

Skills

- Cybersecurity Tools: SIEM - Splunk - IBM QRadar - Elastic - Sentinel - EDR - Wazuh
- Programming Languages: Go - TypeScript - HTML - CSS - JavaScript - Python - SQL - C# - Java - PHP
- Frontend Frameworks: React.js - Next.js - TailwindCSS - MaterialUI
- Backend Frameworks: Express.js - Node.js - Django
- Databases: SQLite - PostgreSQL - MongoDB
- Version Control & DevOps: Git - GitHub - Docker - AWS - Bluehosting
- Development Tools: n8n - Vite - Jest - Firebase Studio
- Design Tools: Figma - Blender - Draw.io
- Productivity Tools: Jira - Trello - Notion - Slack - Ollama - Excel - Power BI - Microsoft 365 - LazyVim
- Operating Systems: Linux - Arch Linux - Ubuntu - Ubuntu Server - Windows
- Languages: Native Spanish - English B1 - French A1 - Chinese A1

About Me

Computer Science & Software Engineer focused on Cybersecurity, with previous experience as a Web and SEO consultant. Strong advocate for Open Source software and continuous self-directed learning, which has allowed me to excel in Bug Bounty programs. Passionate about building tools with TypeScript and Go, ensuring that solutions are not only functional, but secure and robust.
